Date: Tuesday March 13th, 2018

Location: Boston, MA

Presentation Time: 2:30 PM ET

About Pliant Therapeutics

Pliant Therapeutics is a pre-clinical stage biotechnology company harnessing the therapeutic capabilities of integrin biology and TGF- β signaling to develop breakthrough treatments for fibrotic diseases. By leveraging its powerful product engine, Pliant's mission is to prevent or even reverse fibrosis, restoring organ function. The company's pipeline includes a late preclinical stage proprietary dual selective inhibitor for $\alpha_v\beta_6$ and $\alpha_v\beta_1$ integrins. Other, earlier stage programs include integrin and TGF- β signaling targets for multiple fibrotic diseases. For more information, please visit www.pliantrx.com.
